

Roper Pumps

F

Series

F Series pumps give you 8 great ways to deliver under pressure

## Power Under Pressure

The leading force behind liquids.

### Applications

- Hydraulic power for positioning devices, lifts, machine actuation, fuel burners, and blenders
- General transfer applications for oil and petroleum fluids

### Features

- High pressure external gear pump
- Capable of handling pressures to 300psi in standard construction
- 425psi with bearing modifications
- Front pullout design, maintenance without disturbing piping
- Flanged sleeve bushings with grooves to allow for lubrication

### Options

- Four-port design allows 8 optional piping arrangements to reduce installation time and cost.
- Internal relief valve (except F300)
