

O SERIES® SELF-PRIMING CENTRIFUGAL PUMPS

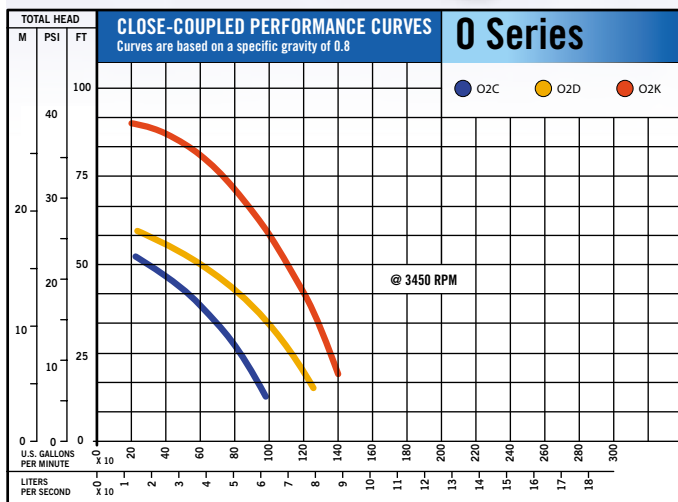

High Efficiency – Self-Priming

Gorman-Rupp O Series® Self-Priming Centrifugal Pumps have a straight-in suction design which eliminates entrance restrictions and provides better performance when handling petroleum products, solvents and similar liquids.

A high-efficiency, balanced, enclosed multivane impeller provides peak performance to handle a wide range of petroleum products. Because these pumps have few moving parts, maintenance and service requirements are minimal.

2" Close-Coupled

HIGH-EFFICIENCY IMPELLER

High-efficiency closed impeller. Bronze or aluminum construction standard. Other metals available for special applications.

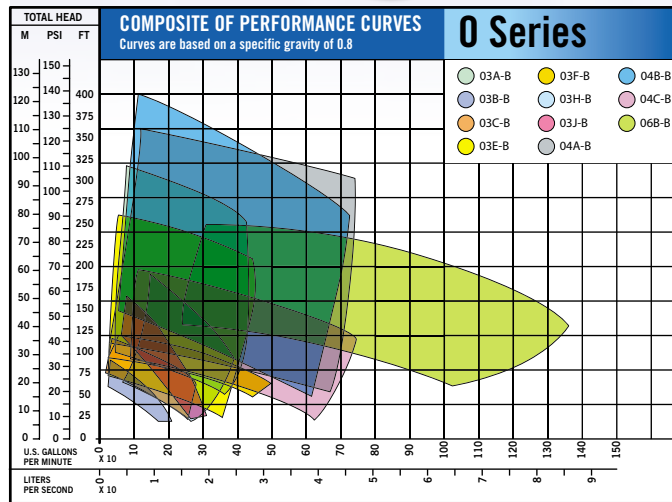

LONG-LIFE SEALS

O Series pumps are available with self-lubricated mechanical shaft seals for dependability and long life. Fluorocarbon elastomers are standard. Teflon® and double seals available on some models. Consult factory for special applications.

Pumps range in size from 2" to 6" (50mm to 150mm), capacities to 1350 gpm (85lps), heads to 400 feet (122m).

2", 3", 4", and 6" Pumps

ADAPTABILITY

O Series pumps are available pedestal mounted for flexible coupling to a power source. Sturdy pedestal has heavy-duty shaft and ball bearings. Some models are available close-coupled to electric motors. Power Take-Off models are also available.

MATERIALS OF CONSTRUCTION

O Series pumps vary in volute material: gray iron, ductile iron & aluminum with impeller materials of copper alloy, aluminum, steel.
